Phone: 252.744.1008

Co-PI: LaMar Grafft

Affiliation: North Carolina Agromedicine Institute

Email: graftl@ecu.edu

Phone: 252.744.9542

Co-PI: Dr. Annette Greer

Affiliation: Department of Bioethics & Interdisciplinary Studies
Brody School of Medicine-East Carolina

Email: greera@ecu.edu

Phone: 252.524.1318

Co-PI: Jessica Wilburn

Affiliation: North Carolina Agromedicine Institute

Email: wilburnj15@ecu.edu

Phone: 252.744.1008

Project Term: 2016-2021

Sponsor: Southeast Center for Agricultural Health and Injury Prevention –University of Kentucky

Project Abstract: The objective of this project is to further expand the capacity that has already been developed by National Institute for Occupational Safety and Health funded projects to train even more professionals in the field of agricultural health and safety in the Southeast. We propose three Specific Aims to build this capacity:

1. Provide in-class training in short, one-week (40 contact hour) courses provided in partnership with colleges and universities in the Southeastern part of the U.S. We will provide this training at institutions with training programs for healthcare providers, public health professionals, or agriculture production.
2. Develop on-line distance delivery of our in-class training program to ensure broader dissemination of our training program. While our focus is the Southeast region, this course can be provided in collaboration with other Ag Centers across the U.S.

3. Using the topic materials developed for the in-class and on-line courses provide continuing education training in a modular format on specific health and safety topics. These topic modules may be delivered via in-class or on-line format.

This project is being conducted as a part of a larger project under the direction of Dr. Wayne Sanderson at the University of Kentucky's Southeast Center for Agricultural Health and Injury Prevention.
